

ABDALRHMAN MOSTAFA

MEAN STACK DEVELOPER

01080631972 | bdhm28191@gmail.com | [LinkedIn](#) | [GitHub](#) | Cairo , Egypt

PROFILE

I'm a Full Stack Developer proficient in both MEAN and MERN stacks, blending logic with emotion to craft interfaces that don't just work—they connect. Every API, animation, and pixel I build is intentional, beautiful, and full of soul.

While I may not yet have extensive experience, I bring relentless passion for learning and self-improvement. I dream of joining a team where I can grow, contribute, and be part of something meaningful. I aspire to become a valuable member of your company—someone who learns fast, adapts quickly, and adds real impact.

I'm highly dependable, technically skilled, and personally driven. My communication skills, collaborative mindset, and problem-solving approach make me a strong team player. I thrive on clarity, structure, and purpose—and I'm always ready to listen, learn, and lead when needed.

WORK EXPERIENCE

Back-End Developer Trainee – RiskRice (2025)

MEAN Stack Development – NTI (2025)

Web Development with React – Digital Egypt Pioneers Program (2024)

Software Development Track – Sprints (2024)

EDUCATION

faculty of computer science and information technology

2022 - 2026

New cairo academy

- Specialization in software engineering.
- Relevant Coursework: Data Structures, Algorithms, Software Engineering

Nti summer training

july 2025 - Aug 2025

Mean stack

- Hands-on training in MongoDB, Express.js, Angular, and Node.js.
 - Built full-stack web applications with RESTful APIs, authentication, and responsive UI using Angular.
 - Focused on backend integration, error handling, and scalable architecture.
-

CERTIFICATION

Back-End Developer Trainee – RiskRice (Shift Up Program)

2025

- Completed the Shift Up – Back End program with RiskRice.
- Gained hands-on experience in backend development, system architecture, and server-side technologies.
- Strengthened ability to build scalable and efficient backend solutions.

MEAN Stack Web Development – ITIDA & NTI

- Completed a specialized hands-on training program focused on building scalable and maintainable web applications using the MEAN Stack (MongoDB, Express.js, Angular, Node.js).
- Applied clean architecture principles, best practices for error handling, and developed interactive UI designs with Angular.
- Worked on practical projects that simulated real-world development challenges, from backend integration to responsive frontend design.
- Gained exposure to freelancing fundamentals, including client communication, project scoping, and professional delivery workflows.
- This program provided both the technical depth of MEAN stack development and the professional mindset required for working with clients and delivering impactful digital solutions.

Digital Egypt pioneers program (web development with react) :

-Mastered core web technologies:

HTML5 – semantic structure, accessibility, SEO-friendly markup

CSS3 – responsive design, Flexbox, Grid, animations, and theming

JavaScript (ES6+) – DOM manipulation, event handling, async programming, and modular code.

-Specialized in React.js development:

Component-based architecture, props, state, and lifecycle methods

React Hooks (useState, useEffect, useContext, useReducer)

React Router for SPA navigation

Axios for API integration and data fetching.

-Applied best practices in:

UI/UX design, accessibility, and performance optimization

Version control with Git & GitHub

Agile methodologies and collaborative development.

Software Development Track – Sprints :

-Completed an intensive React Web Development program under industry mentors-

-Built dynamic single-page applications using React.js and modern JavaScript (ES6+)

-Applied component-based architecture, hooks, and state management

- Practiced real-world development workflows including Git, GitHub, and Agile sprints -

Strengthened problem-solving skills through weekly coding challenges and team projects -

Gained exposure to software engineering principles and clean code practices

PROJECTS

ReadNest – Full-Stack Web Application

- Developed a digital library platform where users can browse, purchase, and download books, while admins manage content via a dedicated dashboard.
- Backend: Node.js, Express.js, MongoDB, Mongoose, Puppeteer (PDF invoices in Arabic & English), Nodemailer (emails), JWT (auth), role-based access, file uploads, cart, wishlist, checkout.
- Frontend: Angular 19, SCSS, Tailwind CSS, RxJS, HttpClient, Reactive Forms with a responsive UI and admin dashboard.
- Organized code using MVC structure, middleware for authentication & role verification, reusable services/utilities, structured folders for scalability, and centralized error handling.
- Implemented modular architecture in frontend with feature modules, shared components, and reusable services for maintainability.
- [GitHub Repo: Project Link](#)

MEAN Stack Project – E-Commerce App

- Built my first complete full-stack web application using the MEAN stack, handling both backend architecture and frontend design independently.
- Leveraged AI tools for debugging, architectural decisions, performance optimization, and UI/UX enhancements.
- Backend: Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, multer, nodemailer, helmet, rate-limit, compression, dotenv, cors.
- Frontend: Angular 19, Angular Material, ngx-translate, Swiper, Bootstrap, SSR, RxJS, and custom UI components.
- Key challenges solved:
- Designed per-item order status logic synced with admin panel.
- Implemented secure authentication & role-based access.
- Managed file uploads, email notifications, and API protection.
- Built a responsive, multilingual UI with dynamic product sliders.
- [GitHub Repo: Project Link](#)

SKILLS

Technical Skills

- Frontend: Angular, React.js, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, JavaScript (ES6+), TypeScript, RxJS
- Backend: Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, Authentication & Authorization (JWT, RBAC)
- Tools & Platforms: Git, GitHub, Postman, VS Code, npm, Webpack
- Other Expertise: Responsive Design, UI/UX Best Practices, Agile Methodologies, PDF & Email Automation, AI-powered tools for debugging, optimization, and architectural decisions

Non-Technical Skills

- Strong problem-solving and analytical thinking
- Ability to learn quickly and adapt to new technologies
- Experience working in team environments and following Agile workflows
- Good time management and ability to handle multiple tasks
- Strong communication skills for explaining technical concepts clearly
