

ABDALRHMAN MOSTAFA

Mean Stack Developer

01080631972 | bdhm28191@gmail.com | [MyLinkedIn](#) | [MyGitHub](#) | Cairo, Egypt

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science-New Cairo Academy | Software Engineering

New Cairo, Egypt | Expected in 2026

- Faculty of computer science and information technology
- Specialization in software engineering.
- Relevant Coursework: Data Structures, Algorithms, Software Engineering

Back-End Developer Trainee – RiskRice (Shift Up Program) 2025

MEAN Stack Web Development – ITIDA & NTI

Digital Egypt pioners program (web development with react)

Software Development Track – Sprints

PROJECTS

ReadNest – Full-Stack Digital Library (MEAN Stack)

Built a digital library platform where users can browse, purchase, and download books, while admins manage content via a dashboard.

Implemented authentication & authorization (JWT, role-based), shopping cart, wishlist, checkout, invoices, and file uploads.

Generated multilingual (Arabic & English) PDF invoices using Puppeteer and automated email notifications with Nodemailer.

Designed responsive UI with Angular 19, Tailwind CSS, and SCSS, applying modular architecture and reusable components.

Followed clean code practices with MVC backend structure, middleware for auth/roles, and centralized error handling.

Full-Stack E-Commerce Web Application (MEAN Stack)

Developed a complete e-commerce platform using the MEAN stack (MongoDB, Express.js, Angular, Node.js).

Implemented secure authentication & role-based access with JWT and bcrypt.

Built per-item order status logic, admin panel integration, and file upload handling.

Added email notifications, API protection, and performance enhancements with middleware (helmet, rate-limit, compression).

Designed a responsive, multilingual UI with Angular 19, Angular Material, Bootstrap, and custom components.

SKILLS

Frontend: Angular (17–19),

- HTML5, CSS3, SCSS, Tailwind
- CSS, Bootstrap, Angular
- Material, RxJS

Tools & AI: Git, GitHub, Postman, VS Code, cursor, npm, Agile, and AI tools for debugging, architecture, optimization, and UI/UX.

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Multer (file handling), Nodemailer (emails), Puppeteer (PDF generation)
Database: MongoDB, Mongoose

EXPERIENCES

Back-end Developer Trainee , 08/2025 - 09/2025 **RiskRice** - Remote |August 2025 - September 2025

Completed Shift Up – Back End program with RiskRice, acquiring expertise in backend development and system architecture. Developed scalable and efficient backend solutions through hands-on experience with server-side technologies. Enhanced skills in building robust backend systems to support dynamic applications.

- Developed RESTful APIs that facilitated seamless data exchange between clients and servers in a distributed environment.
- Built APIs and data clients to consume APIs.

MEAN Stack Development | 2025 - 2025 **NTI - Remote**

Developed and maintained 3+ web applications using MEAN Stack technologies: MongoDB, Express.js, Angular, Node.js.

Implemented one project with TypeScript, another full-stack with Bootstrap, and a third full-stack with Tailwind CSS & SCSS, demonstrating versatility in frontend frameworks.

Applied clean architecture principles and best practices for robust error handling.

Designed interactive user interfaces with Angular to enhance user experience.

Executed practical projects simulating real-world development challenges, integrating backend and responsive frontend design.

Acquired freelancing fundamentals, focusing on effective client communication and project scoping.

Delivered impactful digital solutions while adhering to established professional workflows.

Gained comprehensive technical knowledge in MEAN stack development and client engagement strategies.

- Enhanced front-end performance through implementation of minification tools and adherence to AngularJS coding standards
- Integrated third-party APIs for seamless data exchange between systems, enhancing overall functionality of applications.

Web Development with React, Digital Egypt Pioneers Program Remote | 2024 - 2024

Mastered core web technologies including HTML5 for semantic structure and SEO-friendly markup. Developed responsive designs using CSS3 with Flexbox, Grid, animations, and theming. Utilized JavaScript (ES6+) for DOM manipulation, event handling, and async programming. Specialized in React.js, focusing on component architecture and lifecycle methods. Implemented React Hooks for state management and side effects in applications. Employed React Router for seamless single-page application navigation. Integrated APIs using Axios for efficient data fetching and processing. Applied best practices in UI/UX design, accessibility, and performance optimization.

- Excellent communication skills, both verbal and written.
- Proven ability to learn quickly and adapt to new situations.

Software Development Track, Sprints Remote | 2024 - 2024

Completed intensive React Web Development program under guidance of industry mentors. Developed dynamic single-page applications utilizing React.js and modern JavaScript (ES6+). Employed component-based architecture, hooks, and state management principles. Practiced real-world workflows, including Git, GitHub, and Agile sprints.

Enhanced problem-solving skills through weekly coding challenges and collaborative projects.

Acquired knowledge of software engineering principles and clean code practices.

- Passionate about learning and committed to continual improvement.
